Asia Pacific Regional Internet Conference on Operational Technologies
A neutral educational forum on Skills, Policies, Technologies

APRICOT 2003 - SPONSORSHIP INVITATION

Introduction

APRICOT is Asia Pacific's premier annual educational conference that provides a neutral forum to advance the skills and understanding necessary to grow a robust Internet infrastructure in our region. By bringing valuable knowledge and experience, APRICOT provides a unique opportunity for the region's Internet industry to meet and focus on Internet operational issues that affect all of us.

In the year of 2003, APRICOT will be held in Taipei, Taiwan, co-hosted by Directorate General of Telecommunications (DGT) of Ministry of Transportation and Communication (MOTC) and Taiwan Network Information Center (TWNIC)

For the first time, The Global IPv6 Summit in Asia Pacific will be held in conjunction with APRICOT2003.   It will be a unique and experimental event which focuses on the AP-wide IPv6 community. Members of the Advisory and Steering committees are chosen from AP countries.

About APRICOT

Since 1996, APRICOT has provided a unique and successful educational forum for Internet builders in the region to learn from their peers and other leaders in the Internet community from around the world.   And APRICOT has established itself as Asia Pacific's premier regional Internet Summit where related organizations come together to meet and host their annual general meetings and other special events.

e.g. Asia Pacific Network Information Centre (www.apnic.net)
     Asia & Pacific Internet Association (www.apia.org)
     Asia Pacific Networking Group (www.apng.org)
     Asia Pacific Top-Level Domain Forum (www.aptld.org)
     Asia Pacific Star (www.apstar.org) etc.

APRICOT is dedicated in creating a neutral educational forum that provides for frank discussions on the skills, policies and technologies that are critical for the smooth operation of the Internet's network and service infrastructure both regionally and internationally.   Its program content has a one-year technology horizon. This means to say that APRICOT is involved with those technologies that are either at the heart of today's Internet or those that are very likely to see operational *deployment within the next 12 months*. The key benefit in attending APRICOT is to synchronize local and regional activities with the rapid developments in the wider Internet in an objective manner that distinguishes between operational realities and marketing 'hype'.

As APRICOT has established itself as the premier Internet conference in the Asia Pacific region, so have the attendee numbers demonstrated this growth, with interest in the conference reflecting the growth in the Internet economies in the region (see Chart 1).

Summary of Previous APRICOTs

Year	1996	1997	1998	1999	2000	2001	2002
Host Economy	Singapore	Hong Kong	Philippines	Singapore	S. Korea	Malaysia	Bangkok
No. of Attendees	280	630	320	632	850	888	645
No. of Countries	18	25	24	25	36	33	30
No. of Sponsors	10	27	18	19	37	32	26

Why Sponsor APRICOT 2003?

APRICOT provides substantial benefits to the Asia Pacific Internet development. Due to the fact that APRICOT is organized by an Executive Committee comprised of volunteers from the various Asia Pacific Internet related organizations, therefore, it relies on strategic sponsorships to assist it in fulfilling its role.

Your sponsorship will help APRICOT 2003 to meet the following objectives:
- Reducing the financial burden on members attending APRICOT by securing contributions of monetary or in-kind support in areas such as meeting rooms, equipment, Internet connection, social activities, and meals.
- Providing a unique and successful educational forum for Internet builders in the region to learn from their peers and other leaders in the Internet Community from around the world which will contribute to the Internet development of the region.

In return for the support, sponsors will be presented with valuable opportunities to expose your organization, products and services to an international audience of Internet builders.   Most importantly, this exposure would be in the context of a respected, recognized, and highly credible forum.

Event Description

When	19 February to 23 February 2003: Pre-conference Workshops 24 February to 28 February 2003: APRICOT Tutorials & Conference
Where	Grand Hyatt Taipei: Pre-conference Workshops Taipei International Convention Center: APRICOT Tutorials & Conference
Who	APRICOT targets those individuals who directly impact the operational deployment and stability of Internet protocol (IP)-based networks and services. These are network operators and engineers, senior executives and regulators. On the basis of previous events, APRICOT expects approximately 800-1000 participants at this meeting.
What	APRICOT brings excellent and practical programme that focuses on Internet operational issues (i.e. issues surrounding the smooth day-to-day operation of Internet-based networks and services). APRICOT brings experts (speakers) from around the world, together with those (participants) who can benefit most from the experts' knowledge and experience Add Pre-conference workshop The intense weeklong summit consists of seminars, workshops, tutorials, conference sessions and birds-of-a-feather (BOFs) meetings that have the following two goals: 1. Spreading and sharing the knowledge required for the operational stability and development of the Internet within the Asia Pacific region 2. Developing affinity groups that foster mutual support throughout the year.

Further information, including the latest updates is available at: http://www.apricot2003.net
