Alternative criteria to renumbering in initial allocation after the final /8 phase

Izumi Okutani (JPNIC)

Terence Zhang (CNNIC)

Current Initial Allocation Criteria

To be eligible to obtain an initial allocation, an LIR must:

a. <u>have used a /24</u> from their upstream provider <u>or demonstrate an immediate need for a /24</u>;

b. have complied with applicable policies in managing all address space previously allocated to it (including historical allocations);

c. <u>demonstrate</u> a detailed plan for <u>use of a /23 within a year</u>; and

d. ~~commit to renumber from previously deployed space into the new address space within one year.~~

Remove this criteria after the final /8 phase

Proposed change to Initial allocation criteria (prop-094)

To be eligible to obtain an initial allocation, an LIR must:

a. have used a /24 from their upstream provider or demonstrate an immediate need for a /24;
b. have complied with applicable policies in managing all address space previously allocated to it (including historical allocations);
c. demonstrate a detailed plan for use of a /23 within a year; and
d. commit to renumber from previously deployed space into the new address space within one year.

Criteria.d) is removed for initial allocation under "9.10 Distribution of the final /8 worth of space in the unallocated APNIC IPv4 address pool"
