

RPKI in AP-region BoF

APNIG35

2013.2.27 Wed

17:45-18:22

Agenda

- CNNIC Update, Di Ma, CNNIC
- Hackathon Update
- Discussion
 - Further trying RPKI implementations

Hackathon update

- Configurations for testing started
 - TW
 - KR
 - VN

We are (finally) trying CA hackathon

- Hack + Marathon
- A kind of event people who has specific interest gathering to developing or coding at one place.
- Some hackathon has team arrangement and discussion on what to do.
- Hackathon is said to archive sharing technical information and ideas during development and it makes things forward.

Purpose

- Purpose of this trial is for designing “deployment image” and discussing trade-offs in RPKI certification to prepare for further deployment of resource CA in AP-region.

Points we would discuss

- Test with APNIC production system
- Publication point in AP-region
- Testbed for:
 - RIR-NIR connection
 - Between NIR
 - Testing server
- Software development
 - CA in APNIC
 - CA in NIR
- ML (to be arranged later)
 - rpki@rpki.net
